

# **BRS**

## **BOAT REFUELLING SYSTEM**

## **BOAT REFUELLING SYSTEM (BRS)**

**For refuelling boats and filling cans e.g. with fuel on board of a ship**

- Diesel and Gasoline
- ATEX, IEC EX
- Causes no mess or spills – clean handling
- Self service capable
- Capacity approx. 70 l/min
- Compact smart-profile design

### **FEATURES**

- Easy handling by pneumatic hose rewinding
- Pump and refuelling module always ex-proof
- Monitoring and control of up to two tanks possible
- Integration of bunker connection on demand
- Complete bunker equipment for ex-tanks available

### **OPTIONAL**

- Pump module with (two) redundant pumps
- Connected to internal monitoring control system IMCS via Ethernet

# BRS

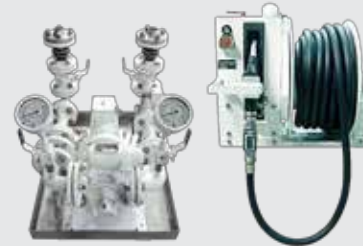

## BOAT REFUELLING SYSTEM

### BRS – PM, RM, SM

- Easy and safe to operate
- For diesel and gasoline

- Modular concept for multiple applications
- Compact design for easy and proper integration

### CONFIGURATIONS

#### PM 1-70 ex 440

Pump Module

1 = 1 Pump  
2 = 2 Pumps

400 = 400V / 50Hz  
440 = 440V / 60Hz

#### RM S ex

Refuelling Module

S = hose up to 25m DN21  
L = hose up to 80m DN21

Hose and nozzle included,  
possible meter optional

#### SM 1T

Control Cabinet

OT = without tank monitoring  
1T = tank monitoring for 1 tank  
2T = tank monitoring for 2 tanks

#### Z

Z = meter not ex proof  
Z ex = meter ex proof

### DIMENSIONS
